for future reference.

QUICK START GUIDE

Please read the corresponding content for detailed operating method.

Connecting to Power Supply

The power supply is 120VAC 60Hz

The specification of the socket is 10A 120VAC

The connection of the drain pipe: Put end of the drain into a sink or bucket.

Adding Water to the Tank

Note: Before adding water, you need to press the power button to turn on the dishwasher

There are two ways to add water into the tank:

- 1 Connect inlet hose to the tap
- 2 Open the cap and slowly add water into the dishwasher's tank manually

There are two ways to keep the tank filled.

1. Before starting:

When the tank is full of water, the machine will beep fleetly for 3 seconds.

2. After starting:

Water is not enough,  light is on;

Water is enough,  light will be off and the machine will beep fleetly for 3 seconds.

or

Prep the Dishware

Remove the large residue on the dishware and glasses before placing into the dishwasher.

Loading The Dishwasher

Place dishes in the dishwasher in order by size and starting from the two ends, then load into the middle. All cutlery are suggested to be tilted to improve cleaning performance. The top arm will be blocked if cutlery is improperly placed and the cleaning effect may not be ideal.

Do not place the cutlery in the upright direction or the cleaning performance may be effected. Try to leave the dirty side facing towards the spray arm.

Detergent Dispenser. (Do not use detergent when running the FRUIT program.)

Starting The Dishwasher

Close the front door, choose the program and press START.

CONTENTS

Please carefully read this manual before using the dishwasher, it will help you use and maintain the dishwasher properly .

IMPORTANT SAFETY INSTRUCTIONS

WARNING

When using your dishwasher , follow the precautions listed below:

- This appliance is intended to be used in household and similar applications such as:
 - Staff kitchen areas in shops, offices and other working environments;
 - Households;
 - by clients in hotels, motels and other residential type environments;
 - bed and breakfast type environments.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- This appliance is not intended for use by persons(including children)with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- This appliance is for indoor use only, for household use only.
- To protect against the risk of electrical shock, do not immerse the unit, cord or plug in water or other liquid.
- Please unplug before cleaning and maintaining the appliance .
- Use a soft cloth moisten with mild soap, and then use a dry cloth to wipe it again.

Grounding instructions

- This appliance must be grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of an electric shock by providing a path of least resistance of electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug.
- The plug must be plugged into an appropriate outlet that is installed and grounded in accordance with all local codes and ordinances.
- Do not modify the plug provided with the appliance. If it does not fit the outlet, have a proper outlet installed by a qualified electrician.
- Improper connection of the equipment-earting conductor can result in the risk of an electric shock. Check with a qualified electrician or service representative if you are in doubt whether the appliance is properly grounded.

• General use

- Do not abuse, sit on, or stand on the door or dish rack of the dishwasher.
- Do not operate your dishwasher unless all enclosure panels are properly in place.
- Open the door very carefully if the dishwasher is operating, there is a risk of water squirting out.
- Do not place any heavy objects on or stand on the door when it is open. The appliance could tip forward. When loading items to be washed:
 - 1) Locate sharp items so that they are not likely to damage the door seal;
 - 2) **Warning: Knives and other utensils with sharp points must be loaded in the basket with their points down or placed in a horizontal position.**
- Check that the detergent powder is empty after completion of the wash cycle.
- Do not wash plastic items unless they are marked dishwasher safe or the equivalent. For plastic items without mark, check the manufacturer's recommendations.
- Use only detergent additives designed for an automatic dishwasher.
- Never use soap, laundry detergent, or hand washing detergent in your dishwasher. Children should be supervised to ensure that they do not play with the appliance. The door should not be left open, since this could increase the risk of tripping.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- During installation, the power supply must not be excessively or dangerously bent or flattened.
- Do not tamper with controls.
- The appliance is to be connected to the water mains using new hose sets and that old hose-sets should not be reused.
- The maximum number of place settings to be washed is 2 in AHAM test, 1 setting in DOE test. The maximum permissible inlet water pressure is 1MPa.
- The minimum permissible inlet water pressure is 0.04MPa.

• Disposal

- For disposing of package and the appliance please go to a recycling centre. Therefore cut off the power supply cable and make the door closing device unusable.
- Cardboard packaging is manufactured from recycled paper and should be disposed in the waste paper collection for recycling.
- By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.
- For more detailed information about recycling of this product, please contact your local city office and your household waste disposal service.
- DISPOSAL: Do not dispose this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary.

GETTING TO KNOW YOUR APPLIANCE

IMPORTANT:

Before using this dishwasher for the first time and to get the best performance, read these instructions.

• Dishwasher features

Fruit Rack

5L Water Container

• Control panel

1 POWER	To turn on and off.
2 CYCLES	<p>Program Button: Press the button to select wash cycles P1(STEAM) -P2 (GLASS) -P3(FRUIT).</p> <p>STEAM: High temp for washing baby bottles etc.(Steam Adding).</p> <p>GLASS: Suitable for washing delicate ware with light soiled.</p> <p>FRUIT: Suitable for washing hard surface fruit.</p>
3 AIR REFRESH	Air Refresh function, help to improve the dry performance, or prevent peculiar smelly. Default setting on, touch to close.
4 DELAY	The Delay Time feature allows you to program the dishwasher to begin the selected wash cycle between 0 to 24H hours later.
5 DISPLAY	<p>Display the program time, error code etc.</p> <p> Water Faucet Icon</p> <p>If the"  "indicator is lit, it means the water faucet is closed.</p>
6 LOCK	Press and hold for 3 seconds to activate or cancel the control Lock option
7 NORMAL	Suitable for washing normally soiled dishes.
8 RAPID	Suitable for lightly soiled or well-rinsed dish loads.
9 START/ CANCEL	<p>START Press this button to start the dishwasher, the process pilot lamp will be blinking when starting.</p> <p>PAUSE If you need to pause a cycle in process, open the door slightly and wait a few seconds until the wash action stops.</p> <p>CANCEL Press and hold START for 3 seconds to cancel a cycle when the dishwasher is running.</p>

USING YOUR DISHWASHER

• Loading The Dishwasher

Recommendation

- Consider buying utensils which are identified as dishwasher-proof.
- Use a mild detergent that is described as 'kind to dishes'. If necessary, seek further information from detergent manufacturers.
- For particular items, select a program with lower temperatures.
- To prevent damage, do not take glass and cutlery out of the dishwasher immediately after the program has ended.

Items Not Recommended for Dishwasher Use

Not suitable for use:

- Cutlery with wooden, horn, china or mother-of-pearl handles
- Plastic items that are not heat resistant Older
- cutlery with glued parts that are not temperature resistant
- Bonded cutlery items or dishes
- Pewter or copper items
- Crystal glass
- Steel items subject to rusting
- Wooden items
- Items made from synthetic fibres

Limited suitability:

- Some glasses can become dull after a large number of washes.
- Silver and aluminium have a tendency to discolour during washing.
- Glazed patterns may fade if washed frequently.

Attention before or after loading the dishwasher baskets

(For the best performance of the dishwasher, follow these loading guidelines. Features and appearance of baskets and cutlery baskets may vary from your model.)
Scrape off any large food particles. Soften remnants of burnt food in pans. It is not necessary to rinse the dishes under running water. Place objects in the dishwasher in following way:

- Items such as cups, glasses, pots/pans, etc. load face downwards.
- Curved items, or those with recesses, should be loaded at a slant so that water can run off.
- All utensils are stacked securely and can not tip over.

- All utensils are placed in the way that the spray arms can rotate freely during washing.

NOTE

Very small items should not be washed in the dishwasher as they could easily fall out of the basket.

- Load hollow items such as cups, glasses, pans etc. with the opening facing downwards so that water cannot collect in the container or a deep base.
- Dishes and cutlery must not lie inside one another, or cover each other.
- To avoid damage to glasses, they must not be touched.
- Long bladed knives stored in an upright position are a potential hazard!
- Long and/or sharp items of cutlery such as carving knives must be positioned horizontally in the basket.
- Please do not overload your dishwasher. This is important for good results and for reasonable energy consumption.

Loading The Baskets

Position the dishes and cookware so that they will not get moved by the spray of water.

Recommended loading layouts below

2×Serving Bowl (1L)

1×Oval Platter (9.5in)

2×Serving Spoons

1 × Serving Forks

1×Dinner Plates (10in)

1× Bread And Butter Plate (6.7in)

1×Dessert Bowl (5in)

1 × Cups

1 × Saucer (5.5in)

1 × Glass (12.50Z)

1 × Dinner Fork

1×Salad Fork

1×Knives

1 × Teaspoons

Recommended loading layout with 1 serving bowl and 2 settings personal tableware.

Folding Down The Rack Shelves

The spikes are used for holding plates and a platters. They can be lowered to make more room for large items.

Folding down to load large size tableware or fruit basket or baby bottle rack.

• Loading The Detergent

This product don't support to add rinse aid. It only need to add detergent.

WARNING

- **Only use detergent specifically for dishwashers.**
Never use any other rinse aid and detergents.
This will damage the appliance.
-  **Dishwasher detergent is corrosive!
Keep dishwasher detergent out of the reach of children.**

Concentrated Detergent

Based on their chemical composition, detergents can be split in two basic types:

- Conventional, alkaline detergents with caustic components.
- Low alkaline concentrated detergents with natural enzymes.

The use of Normal washing program in combination with concentrated detergent reduces pollution and is good for your dishes.

Detergent Tablets

Detergent tablets of different brands dissolve at different speeds. For this reason some detergent tablets cannot dissolve and develop their full cleaning power during short programs. Therefore please use long programs when using detergent tablets, to ensure the complete removal of detergent residuals.

Detergent

The detergent must be refilled before the start of each wash cycle following the instructions provided in the Wash Cycle Table. Your dishwasher uses less detergent than conventional dishwasher. Generally, only one tablespoon of detergent is needed for a normal wash load. More heavily soiled items need more detergent. Always add the detergent just before starting the dishwasher, otherwise it could get damp and will not dissolve properly.

Adding detergent

Detergent Dispenser

PROGRAMMING THE DISHWASHER

Wash Cycle Programs

The table below shows which programs are best for the levels of food residue on them and how much detergent is needed. It also show various information about the programs.

Program	Cycle Selection Information	Description Of Cycle	Detergent	Time (min)	Energy (Kwh)	Water (Gal.)
NORMAL	This is standard program, it is suitable to clean normally soiled tableware and it is the most efficient program in terms of its combined energy and water consumption for that type of tableware.	Wash(136 °F) Rinse Rinse(158 °F) Drying	8.4g	130	0.29	1.32
RAPID	A shorter wash for lightly soiled loads and quick wash.	Wash (122 °F) Rinse Rinse	8.4g	40	0.11	1.32
STEAM	Suitable for washing baby bottles. (Steam Adding)	Wash(158 °F) Rinse Rinse(162 °F) Drying	8.4g	120	0.42	1.32
FRUIT	Use to wash hard surface fruit, only manually adding cold water, not auto mode from the faucet.	Wash	/	20	0.01	1.32
GLASS	The temperature is suitable for delicate ware with light soiled.	Wash (122 °F) Rinse Rinse (144 °F) Drying	8.4g	110	0.19	1.32

• Turning On The Appliance

Starting a wash cycle...

Draw out the basket(see the section entitled "Loading the Dishwasher").

Pour in the detergent (see the section□Fill the detergent□).

Insert the plug into the socket. The power supply is 120VAC 60HZ,

Press the power button to turn on the appliance,

Connect the inlet hose to the tap, make sure that the water supply is turned on to full pressure, or add water to the tank manually.

Select a suitable program according to the □Wash cycle table□;

If a program is selected, the response light will illuminate. Then press the Start/Cancel button, the dishwasher begins to start.

▲ NOTE

When you press the Start/Cancel button to pause during washing, the dishwasher will mooing every minute unless you press the Start/Cancel button to start.

• Change The Program

A wash cycle can only be changed if it has been running for a short time otherwise, the detergent may have already been released and the dishwasher may have already drained the wash water. If this is the case, the dishwasher needs to be reset and the detergent dispenser must be refilled. To reset the dishwasher, follow the instructions below:

1. Press the Start/Cancel button to pause the washing.
2. Press and hold Start/Cancel for more than 3 seconds,the machine will be in stand by state.
3. Press a new program button to select the desired program.
4. Press the Start/Cancel button, the dishwasher will start.

⚠ NOTE

If you open the door during washing, the machine will pause. When you and press the Start/Pause Button, the machine will keep on working after 10 seconds.

• Forget to add a dish?

A forgotten dish can be added any time before the detergent dispenser opens. If this is the case, follow the instructions below:

1. Press the Start/Cancel button OR open the door a little to stop the washing.
2. After the spray arms stop working, you can open the door completely.
3. Add forgotten dishes.
4. Close the door.
5. Press the Start/Cancel button after 10 seconds, the dishwasher will run .

• End Of Wash Cycle

When the working cycle has finished, the buzzer of dishwasher will sound 8 seconds, then stop. Turn off the appliance using the ON/OFF button, shut off the water supply and open the door of the dishwasher. Wait a few minutes before unloading the dishwasher to avoid scald, the dishes and utensils are still hot and more susceptible to breakage. They will also dry better.

- **Switch Off the Dishwasher**

1. Switch off the dishwasher by pressing the ON/OFF button.
2. Turn off the water tap!

- **Open the door carefully**

The dishes should be allowed to cool down around 15 minutes before removing from the appliance.

Open the dishwasher's door, leave it ajar and wait a few minutes before removing the dishes. In this way they will be cooler and the drying will be improved.

- **Unloading the dishwasher**

It is normal that the dishwasher is wet inside.

WARNING

It is dangerous to open the door when washing, because the hot water may scald you.

• Forced Drainage Operation

In standby mode, you can press and hold □NORMAL□ button + □RAPID□  for 3 seconds simultaneously to drain the water tank.

MAINTENANCE AND CLEANING

Filter System

⚠ WARNING

- **Never use the dishwasher without filters!**
- **Make sure the filter is properly assembled.**
The performance may be affected and dishes and utensils could become damaged.

The filter efficiently removes food particles from the wash water, allowing it to be recycled during the cycle.

For best performance and results, the filter assembly must be cleaned regularly. For this reason, it is a good idea to remove the larger food particles trapping in the filter after each wash cycle by rinsing the filter and cup under running water. To remove the filter assembly, pull the cup handle in the upward direction.

• B. Fine Filter

Have the Unlined Parts continue throughout the whole word for both the Fine and Main Filter.

• A. Main Filter

Food and soil particles trapped in this filter are pulverized by aspecial jet on the lower spray arm and washed down to drain.

Step 1: Turn the filter assembly clockwise, then lift it up.

Step 2: Lift fine filter up and sepearate it from the main filter.

NOTE

To re-install the filter system, complete Step 2 to Step 1.

The entire filter assembly should be cleaned once a week.

- Inspect the filters for blockages after every time the dishwasher has been used.
- By unscrewing the coarse filter, you can remove the filter system. Remove any food remnants and clean the filters under running water.

WARNING

When cleaning the filters, don't knock on them. Otherwise, the filters could be contorted and the performance of dishwasher could be decreased.

Dishwasher Care

The control panel can be cleaned by using a lightly dampened cloth. After cleaning, make sure to dry it thoroughly. For the exterior use a good appliance polish wax. Never use sharp objects, scouring pads or harsh cleaners on any part of the dishwasher.

Cleaning The Door

To clean the edge around the door, you should use only a soft warm, damp cloth. To avoid penetration of water into the door lock and electrical components, do not use a spray cleaner of any kind.

WARNING

- Never use a spray cleaner to clean the door panel as it may damage the door lock and electrical components.
- Abrasive agents or rough paper towel should not be used because of the risk of scratching or leaving spots on the stainless steel surface.

Protect against freezing

Please take frost protection measures on the dishwasher in winter. Each time after washing cycles, please operate as follows.

1. Cut off electrical power to the dishwasher.
2. Turn off the water supply and disconnect the water inlet pipe from the water valve.
3. Drain water from the inlet pipe and water valve (use a pan to catch the water).
4. Reconnect the water inlet pipe to the water valve.
5. Remove the filter at the bottom of the tub and use a sponge to soak up water in the sump.

⚠ NOTE

If your dishwasher cannot work because of the ice, please contact our customer service team.

Cleaning The Spray Arms

The spray arms can be easily removed for periodic cleaning of the nozzles to prevent possible clogging. Wash them under running water and carefully replace them in their seats, checking that their rotary movement is in no way impeded.

Grasp the middle of the spray arm, pull it upwards to remove it. Wash the arms under a jet of running water and replace it carefully to its seat. After reassembly, check that the spray arms rotate freely. Otherwise, check that they have been installed correctly.

Dishwasher Maintenance

After Every Wash

After every wash, turn off the water supply to the appliance and leave the door slightly open so that moisture and odors are not trapped inside.

Remove The Plug

Before cleaning or performing maintenance, always remove the plug from the socket.

Cleaning Best Practices

To clean the exterior and rubber parts of the dishwasher, do not use solvents or abrasive cleaning products. Only use a cloth with warm soapy water.

To remove spots or stains from the surface of the interior, use a cloth dampened with water and a little vinegar, or a cleaning product made specifically for dishwashers.

When Left Unused

It is recommended that you run a wash cycle with the dishwasher empty and then remove the plug from the socket, turn off the water supply and leave the door of the appliance slightly open. This will help the door seals to last longer and prevent odors from forming within the appliance.

Moving the Appliance

If the appliance must be moved, try to keep it in vertical position. If absolutely necessary, it can be positioned on its back.

INSTALLATION

WARNING

Electrical Shock Hazard

Disconnect electrical power before installing dishwasher.

Failure to do so could result in death or electrical shock.

Attention

The installation of the pipes and electrical equipments should be done by professionals.

• **Installation preparation**

The installation position of dishwasher should be near the existing water inlet tap and drain outlet and power socket.

One side of the cabinet sink should be chosen to facilitate the connection of drain hoses of the dishwasher.

• **Positioning the Appliance**

Position the appliance in the desired location. The back should rest against the wall behind it, and the sides, along the adjacent cabinets or wall. The dishwasher is equipped with water supply and drain hoses that can be positioned to the right or the left to facilitate proper installation.

• About Power Connection

⚠ WARNING

For personal safety:

- Do not use an extension cord or an adapter plug with this appliance.
- Do not, under any circumstances, cut or remove the earthing connection from the power cord.

Electrical Requirements

Please look at the rating label to know the rating voltage and connect the dishwasher to the appropriate power supply. Use the required fuse 10 amp, time delay fuse or circuit breaker recommended and provide separate circuit serving only this appliance.

Electrical Connection

Ensure the voltage and frequency of the power being corresponds to those on the rating plate. Only insert the plug into an electrical socket which is grounded properly. If the electrical socket to which the appliance must be connected is not appropriate for the plug , replace the socket, rather than using adaptors or the like as they could cause overheating and burns.

⚠ Ensure that proper grounding exists before use

• Water Connection

Connect the hot water supply hose to a threaded 3/4(inch) connector and make sure that it is fastened tightly in place.

If the water pipes are new or have not been used for an extended period of time, let the water run to make sure that the water is clear and free of impurities. If this precaution is not taken, there is a risk that the water inlet can get blocked and damage the appliance.

Please Note: If the supplied hose does not fit your tap, please contact your local plumbing supply center where adapters are available for purchase.

• Connection of drain hoses

The clamps must be tightened with a screwdriver.

The connection of the drain pipe: Put end of the drain into a sink or bucket.

How to Drain Excess Water From Hoses

If the sink is more than 39 1/4" (1000mm) higher than the floor, the excess water in hoses cannot be drained directly into the sink. It will be necessary to drain excess water from hoses into a bowl or suitable container that is held outside and lower than the sink.

Water Outlet

Connect the water drain hose. The drain hose must be correctly fitted to avoid water leaks. Ensure that the water drain hose is not kinked or squashed.

Extension Hose

If you need a drain hose extension, make sure to use a similar drain hose. It must be no longer than 13", otherwise the cleaning effect of the dishwasher could be reduced.

TROUBLESHOOTING TIPS

• Before calling for service

Reviewing the charts on the following pages may save you from calling for service.

Problem	Possible Causes	What To Do
Dishwasher doesn't start	Fuse blown, or the circuit break tripped.	Replace fuse or reset circuit breaker. Remove any other appliances sharing the same circuit with the dishwasher.
	Power supply is not turned on.	Make sure the dishwasher is turned on and the door is closed securely. Make sure the power cord is properly plugged into the wall socket.
	Error code: E1; Water pressure is low	Check that the water supply is connected properly and the water is turned on.
	Door of dishwasher not properly closed.	Make sure to close the door properly and latch it.
Water not pumped from dishwasher	Twisted or trapped drain hose.	Check the drain hose.
	Filter clogged.	Check coarse the filter.
	Kitchen sink clogged.	Check the kitchen sink to make sure it is draining well. If the problem is the kitchen sink that is not draining , you may need a plumber rather than a serviceman for dishwashers.
Suds in the tub	Wrong detergent.	Use only the dedicated dishwasher detergent to avoid suds. If suds exist in the washer. Open the door for 20-30 minutes to allow the foam to evaporate. If the foam still exists in the liner. Add 1.5L of water to the liner, close the dishwasher door and run a forced drain to drain it with the water. Repeat above operation until the foam is cleared.

Problem	Possible Causes	What To Do
	Spilled rinse-aid.	Always wipe up rinse-aid spills immediately.
Stained tub interior	Detergent with colorant may have been used.	Make sure that the detergent has no colorant.
White film on inside surface	Hard water minerals.	To clean the interior, use a damp sponge with dishwasher detergent and wear rubber gloves. Never use any other cleaner than dishwasher detergent otherwise, it may cause foaming or suds.
There are rust stains on cutlery	The affected items are not corrosion resistant.	Avoid washing items that are not corrosion resistant in the dishwasher.
	A program was not run after dishwasher salt was added. Traces of salt have gotten into the wash cycle.	Always run a wash program without any crockery after adding salt. Do not select the Turbo function (if present).
	The lid of the softer is loose.	Check the softener lid is secure.
Knocking noise in the dishwasher	A spray arm is knocking against an item in a basket	Interrupt the program and rearrange the items which are obstructing the spray arm.
Rattling noise in the dishwasher	Items of crockery are loose in the dishwasher.	Interrupt the program and rearrange the dishware.
Knocking noise in the water pipes	This may be caused by on-site installation or the cross-section of the piping.	This has no influence on the dishwasher function. If in doubt, contact a qualified plumber.
The dishes are not clean	The dishes were not loaded correctly.	See notes in "Loading & unloading your dishwasher".
	The program was not powerful enough.	Select a more intensive program.

Problem	Possible Causes	What To Do
The dishes are not clean.	Not enough detergent was dispensed.	Use more detergent, or change your detergent.
	Items are blocking the movement of the spray arms.	Rearrange the items so that the spray can rotate freely.
	The filter combination is not clean or is not correctly fitted in the base of washcabinet. This may cause the spray arm jets to get blocked.	Clean and/or fit the filter correctly. Clean the spray arm jets.
Cloudiness on glassware.	Combination of soft water and too much detergent.	Use less detergent if you have soft water and select a shorter cycle to wash the glassware and to get them clean.
White spots appear on dishes and glasses.	Hard water area can cause limescale deposits.	Add more detergent.
Black or grey marks on dishes	Aluminium utensils have rubbed against dishes	Use a mild abrasive cleaner to eliminate those marks.
Detergent left in dispenser	Dishes block detergent dispenser	Re-loading the dishes properly.
The dishes are not drying	Improper loading	Load the dishwasher as suggested in the directions.
	Dishes are removed too soon	Do not empty your dishwasher immediately after washing. Open the door slightly so that the steam can come out. Take out the dishes until the inside temperature is safe to touch. Unload the lower basket first to prevent the dropping water from the upper basket.

Problem	Possible Causes	What To Do
The dishes are not drying	Wrong program has been selected.	With a short program, the washing temperature is lower, decreasing cleaning performance. Choose a program with a long washing time.
	Use of cutlery with a low-quality coating.	Water drainage is more difficult with these items. Cutlery or dishes of this type are not suitable for washing in the dishwasher.

• Error codes

When some malfunctions come on, the appliance will display error codes to warn you:

Codes	Meanings	Possible Causes
E1	Longer inlet time.	A flow meter, drain valve, or pump failure, it should be repaired by a qualified worker.
E3	Not reaching required temperature	Heating tube or thermistor anomaly, it should be repaired by a qualified worker.
E4	Overflow.	Some element of dishwasher leaks .
E5	Thermostat open circuit	It should be repaired by a qualified worker.
E7	Thermostat short circuit	It should be repaired by a qualified worker.
E8	Communication error	It should be repaired by a qualified worker.

WARNING

- If overflow occurs, turn off the main water supply before calling a service.
- If there is water in the base pan because of an overfill or small leak, the water should be removed before restarting the dishwasher.

• Technical Information

Height	17 1/4" (438mm)
Width	16 9/16" (420mm)
Depth	17 1/8" (435mm)
Voltage connected Load	see rating label
Water pressure	0.04 - 1.0MPa
Power supply	see rating label
Capacity	2 place setting(AHAM)

• **1 Year Limited Warranty**

This is the only express warranty for the product and in lieu of any other warranty or condition.

This product is warranted to be free from defects in material and workmanship for a period of one year from the date of original purchase. During this period, your exclusive remedy is repair or replacement of this product or any component found to be defective, at our option; however, you are responsible for all costs associated with returning the product to us and our returning the product or component under this warranty to you. If the product or component is no longer available, we will replace with a similar one equal or greater value.

This warranty does not cover wear from normal use, and operation doesn't conformity with the instruction manual, or damages to the product resulting from accident, alteration, abuse, or misuse. This warranty extends only to the original consumer purchaser, or gift recipient. Keep the original sales receipt, as proof of purchase is required to make a warranty claim. This warranty is void if product is used for other than single-family household use or subjected to any voltage and waveform other than as specified on the label.

We exclude all claims for special, incidental, and consequential damages by breach of express or implied warranty. All liability is limited to amount of the purchase price. Every implied warranty, including any statutory warranty or condition of merchantability or fitness for particular purpose, is disclaimed except to the extent prohibited by law, in which case such warranty or condition is limited to the duration of this written warranty.

This warranty gives you specific legal rights. You may have other legal rights that vary depending on where you live. Some states or provinces do not allow limitations on implied warranties or special, incidental consequential damages, so the foregoing limitations may not apply to you.
